

Specifically, SoCal now seeks to amend the previous authorization in order to site the border-crossing facilities 1.3 miles west of the previously authorized export point. The revised border-crossing facilities would consist of a meter station and 600 feet of 16-inch diameter pipe running from the meter station to the international boundary.<sup>1</sup> According to SoCal, the proposed pipeline facilities will have the capacity to meet the expected demand of 40 MMcf of natural gas per day in the year 2000, although only 10 MMcf of natural gas per day would be exported initially.

SoCal request that such amendments be granted no later than March 1, 1997, to permit the economic, environmental and safety benefits of natural gas to be enjoyed in Mexicali, Mexico and the United States/Mexico border area at the earliest possible date, in order to provide the proposed service by July 15, 1997.0

Any person desiring to be heard or to make any protest with reference to said petition should, on or before February 26, 1997, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214) and the Regulations under the NGA (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any person who has heretofore filed need not filed again.
